

## PROJECT PROFILE

Legend Oilfield Services Ltd. is a well-established expert in the safe and efficient transportation of fluids and chemicals within the North American energy sector. Setting the Gold Standard, Assurgo played a key role as the exclusive advisor for Legend, overseeing the structuring and negotiation of a significant transaction involving a new majority investor: Xtreme Oilfield Technology Ltd.

This strategic move not only infuses new business opportunities and synergies but also ensures continuity through reinvestment by existing management. The collaboration between the management shareholders and the new majority investor is poised to enhance Legend's growth and success, benefitting all stakeholders involved.

### **ABOUT LEGEND OILFIELD SERVICES LTD**

Legend Oilfield Services has established itself as a key player in the energy sector since its inception in 2003. As a locally owned and operated company, Legend Oilfield thrives on its commitment to hard work, deep expertise, and a customer-focused approach. Their mission revolves around delivering efficient, professional, and safety-oriented services, reflecting a strong dedication to meeting and exceeding customer expectations. Their ability to innovate and adapt to the dynamic energy industry underscores their proactive approach to staying relevant and effective in a constantly evolving field.

### **ABOUT XTREME OILFIELD TECHNOLOGY LTD.**

Xtreme Oilfield Technology was incorporated in December 2000 and initially operated out of Bonnyville, Alberta. Starting with a modest fleet, Xtreme focused on vacuum and pressure operations. Over time, the company has expanded its services to include general and specialized tank cleaning, fluid transfers, pressure services and coil tubing services throughout northern Alberta. This specialized expertise has helped Xtreme build a solid reputation in the region's oilfield services sector.
